crni RAL9005, nosivost 1000 kg

SCHRACK-Info

Server cabinets are mainly used in data centers and server rooms where an increased load is required and heavy installations such as servers, UPS, etc., have to be installed.

The maximum load is 1000kg.

Front door: Perforated (70%) metal door arched.

Rear door: Perforated (70%), split metal door arched.

The side panels of the server cabinet can be removed and allows easy access to all installations from all sides.

The server cabinet is cooled both actively and passively.

The cooling works passively via perforated doors and actively via roof fans.

The 19" server cabinet from Schrack Technique ensures a high level of flexibility in cable entry due to the prepared opening option in the upper area.
