# LED Floodlight 150W 12000lm 3000K 220-240V IP65 100° sive b.

Samsung LED chips

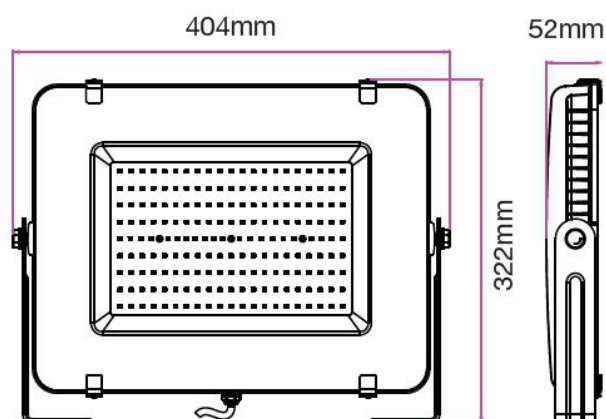

## Tehnički podaci

|                               |                   |
|-------------------------------|-------------------|
| (DxŠxV) mm                    | 404x52x322        |
| Boja                          | siva              |
| Materijal                     | Die-cast aluminum |
| Snaga (W)                     | 150               |
| Radni napon AC (V)            | 220-240           |
| Izvor svj. uklj.              | Da                |
| Boja svjetla                  | Toplo bijela      |
| Svjetlosni tok (lm)           | 12000             |
| Faktor snage                  | >0.9              |
| Faktor uzvrata boje           | ≥80               |
| Dimabilno                     | Ne                |
| Temperatura boje (K)          | 3000              |
| Grlo                          | LED Platine       |
| Životni vijek                 | 30.000h           |
| Kut svjetlosti (°)            | 100               |
| IP stupanj zaštite            | IP65              |
| Min. temperatura okoline (°C) | -20               |

## Tehnički podaci - nastavak

|                                |     |
|--------------------------------|-----|
| Maks. temperatura okoline (°C) | 45  |
| Snaga (W)                      | 150 |
| Duljina (mm)                   | 404 |
| Širina (mm)                    | 52  |
| Visina (mm)                    | 322 |
